## **CURB MARKET HAS** IRREGULAR TONE

Business Is More Active, but Several New Highs Are Swept Away.

REALIZING ACTS AS CHECK

Food Stocks Get Attention and Few Higher Priced Oils Show Activity.

Irregularity followed yesterday a trong tone in the outside market. Busi-ess was on a more active scale and sevness was on a more active scale and several new highs were established in the smorning, but, on realizing, most of the improvements were lost. Interest was centred in stocks which recently were introduced to the market. There was a vigorous demand for Shell Trading and Transport, dealt in for the first time. It advanced more than four points from the initial price, but subsequently lost part of that gain.

of that gain.

A new high was established in General A new high was established in General Asphalt common in the morning, but it suffered a heavy loss in later dealings. Tire stocks again attracted attention with substantial advances, and a few new highs were made. Overland Tire was the most active, and rose more than four points to a new high. Pressman also was firm and moved a point higher to new high ground.

o new high ground.
Food stocks came in for attention with wide movements. Allied Packers. after a steady opening, declined seven points, but most of the loss was recov-ered before the close. Swift Interna-tional was firm early, and then reacted. Anglo-American Commercial was in re-ewed demand and rose to a new high. cramp Shipbuilding was strong following ak opening, and sold to a new high.

weak opening, and sold to a new high.
Activity in the oil group was centred n a few of the higher priced issues.
Minclair issues were firm during the reater part of the session, but developed | Dec. 1923 | 1 | Dec. 1923 | 1 | Dec. 1923 | 1 | Dec. 1924 | 1 | Dec. 1924 | 1 | Dec. 1924 | 1 | Dec. 1925 | Dec. 1925 | 1 | greater part of the session, but developed weakness toward the close. Standard Oil shares were more active and from one to six points higher. Midwest Refining was in better demand and closed at three points higher. Guffey Gillespie was strong early, due to the news that well No. 5 was brought in flowing 450 barrels a day when two feet in the sand. There was a good demand for Middle States Oil. Moderate activity was displayed in the mining section, but changes were small. A broad list of bonds was dealt in. Governments were slightly lower. There Governments were slightly lower. There were initial dealings in Swiss Government 5 1/2s, which changed hands on a when issued basis.

Total sales and range of prices follow: INDUSTRIALS.

## CORN IS EASIER AS SESSION ADVANCES

Prices Fluctuate During Day as Reports of Drought and Rain Alternate.

OATS BECOME STEADY

Provisions Ease at Close, but Session Is Dull, Inactive and Featureless.

Corn was irregular yesterday, being steady through the early part of the session only to become easier in the The weather was again the important factor. Reports of drought caused the buying in the morning and caused the buying in the morning and rumors that rain had fallen in Illinois were responsible for the decline. Prices railied later when the rumors were found untrue. It is possible that rain will fall in Illinois within the next twenty-four hours as it is cloudy there and there are other indications that a storm is pending. Wire troubles were experienced yesterday afternoon, holding up the bids and calls. Condition of the crop at the present time is placed at 87 crop at the present time is placed at 87 per cent, but this is expected to be reduced unless rain falls within the immediate future. It is said that 70 per ent, of the crop could stand a week without moisture provided that the tem-peratures were as low as they were yenterday, but that assertion is disputed by thers who hold that rain must fail over he droughty sections of the belt in the next four days.

No serious complaints have been reseived as yet. The crops in fact have seen doing well. Reports of scattered deterioration continue to be received. Hogs were lower, but had little or no effect on the market. Profit taking checked the advances. Receipts were light, as were the offerings. The move-ment continues small, and as the car shortage fails to improve there is no prospect that more corn will flow lete the market. Yesterday showed another increase in Argentine prices. This is due primarily to the large export domend, particularly from the European countries. The weather there has improved, but still it must be remembered that considerable damage was done by

light offerings, car shortage and lack of pressure. Threshing returns continue disappointing. Buyers were timid in the early part of the session, due to recent increase in hedging and the poor export outlook. Reports that the crop is de-teriorating are still being received. In the afternoon the market hardened as off-rings became source. Provisions were irregular, closing easier. Their market was dull, inactive and feature-

During the forenoon the coffee market showed yesterday a fairly stead; undertone, but the volume of business throughout the session showed no particular improvement. On the call prices were 2 to 9 points higher than at the previous close, which may have reflected the firmer tone of the Rio market, which was 200 reis higher, and reports of better ocal spot demand, with prices advanc-ng. That demand was not considered sufficiently active or general enough to ndicate material change among roasters What demand there was was attributed generally to speculative buying, with commission houses the principal sellers. During the general dulness late in the

day and in the absence of demand prices sagged off, closing at net declines of 10 A fair business was reported in the spot market, mostly between importers and jobbers on the Street, with Rio 7s advancing to 22%c. and Santos 4s to

### Section of the part of the

Middle States Oil

Corporation

Important Notice to Stockholders

RECENTLY statements and inquiries have come to the office of Middle States Oil Corporation to the effect that stockholders, who acquired their stock approximately at One Dollar per share months ago, should now dispose of their stock and invest or

exchange for stocks of new Companies that might make as gratify-ing progress in the early future as the Middle States Oil Corpora-

made direct to those who address their inquiries to the Company's office, the President advises the stockholders to ask for specific in-

formation which will be promptly given them, before deciding upon any exchange or sale. Of course, all stockholders have a perfect right to sell, or exchange stock when they see fit, and the manage-

ment has no objection to a stockholder exercising his personal

privilege, but simply wants the stockholders to understand that Middle States Oil Corporation, from present conditions and prog-

ress, in the opinion of the management should do even better as time passes than it has in the beginning; having the advantage of nearly three years development and laying the foundation for sub-

stantial results its progress should certainly be more rapid.

For example, of the twelve wells reported drilling in Oklahoma

and Texas a month ago, four have been completed—one in the Osage Nation, Oklahoma; one in the Torriokla Lease, Oklahoma; one in the Ranger Field, and one in the Burkburnett Field, Texas,

with a total production reported at over Three Thousand (3,000)

barrels. The drilling equipment promptly moved to four new lo-cations still keeps twelve wells drilling. The Company's policy of drilling nothing but offset locations makes success a practical cer-

tainty. The drilling well in Northwest extension Burkburnett Field should be completed within one week, which, when started, had a nearby offset to the East, and since has a guaranteed success by

the bringing in of a Three Thousand (3,000) barrel oil well 450 ft. to the North of it. This completely surrounds this well with large

production, and briefly stated, the above is only part of the encouraging conditions that lead us to say Middle States Oil Corporation stock is much below its value at the present price.

To the end that all stockholders may have the same reply that is

### COTTON PRICES GO TO LOWER LEVELS

Final Trading Shows Slight Rise and Market Steady at 20 to 55 Points Off.

SPOTS ALSO HAVE DROP

Futures Close Steady to Firm and Spots Are Stabler in Liverpool.

There was yesterday an easier tendency evident in the cotton market, the The drop may be accounted for by the inclination on the part of many longs to take profits in fear of a substantial betterment in crop conditions. The alarming decrease in export dearances from this side also was discouraging to the buil crowd. At one time early in the session prices were bid up above the previous closing, but on the whole there was not enough aggressive buying power present to hold prices firm. Reports received by local concerns stat-

ing that goods were somewhat quieter were the cause perhaps of a little liqui-dation by local longs, and the unsettled labor situation in Great Britain did not labor situation in Great Britain did not make for favorable sentiment. In Liverpool spots were slightly more active; sales were 5,000 bales, and futures closed steady to firm. The immediate weather was again about the chief influence, and while further showers were indicated in various parts of the belt the man senerally gave along a close. the map generally gave signs of clear-

the map generally gave signs of clear-ing weather everywhere.
